## Professional Experience :

### Full Stack Developer

Netaxis IT solution PVT – Anna Nagar East

05/2025 – Present

#### Key Responsibilities:

- Built scalable web applications using Laravel (PHP) following **MVC architecture**.
- Developed RESTful APIs for AngularJS frontend with structured **routes, controllers, and services**.
- Used **Eloquent ORM for database operations** with relationships, eager loading, and query optimization.
- Implemented **middleware** for authentication, access control, and logging.
- Used Laravel **Queues/Jobs** for background tasks (emails, invoices).
- Created reusable FormRequest validations and applied clean controller logic.
- Developed core **modules**: user auth, product catalog, cart, orders, admin panel.
- Managed database **migrations, seeders, and data factories**.
- Integrated payment **gateways**, file uploads, and SMTP email services.
- Ensured clean code using Service classes, Repositories, and Helpers.
- Followed Agile practices, used **Git, and tested APIs with Postman**.
